Solution
Connectivity

Company Overview

Sunnybrook Health Sciences Centre is one of Canada's largest and most dynamic hospitals, providing critical care to over one million patients every year.

Over the past 60 years, Sunnybrook Health Sciences Centre has grown exponentially from a veterans' hospital, to a world class facility providing ground-breaking care for Canada's war veterans, highrisk pregnancies, critically-ill newborns, adults and elderly, and treating and preventing cancer, cardiovascular disease, neurological disorders, orthopedic and arthritic conditions and traumatic injuries.

Business Challenge

Sunnybrook Health Sciences Centre was presented with a unique challenge of managing critical data for over 1 million patients annually, reliably and securely. As a publicly funded institution, Sunnybrook Health Sciences Centre also required a cost-effective solution that would not see loss to the quality of services.

Solution & Business Benefits

After learning more about those needs, Cogeco Peer 1 worked with Sunnybrook Health Sciences Centre to develop a technologically advanced, cost-effective solution that met the Centre's needs efficiently and reliably, and provided the security required to provide physicians, researchers and students access to critical patient information.

To ensure reliable and secure data management, Cogeco Peer 1 developed a solution that would provide FastFiber connectivity services and Internet service to Sunnybrook's facilities allowing for critical sharing of patient information between physicians and researchers. Cogeco Peer 1 cost-effective, reliable solution allowed the Centre to devote its efforts to the care of its patients rather than the care of its network.

As a world renowned centre for health sciences, Sunnybrook Health Sciences Centre is continually thought of as game changer in the world of research and health sciences, "With a growing offering of services for business enterprises, Cogeco Peer 1 is effectively positioning itself as a game-changer in the traditional metropolitan short-haul fibre market," said Oliver Tsai, Director of Information Technology, Sunnybrook Health Sciences Centre.

“With a growing offering of services for business enterprises, Cogeco Peer 1 is effectively positioning itself as a game-changer in the traditional metropolitan short-haul fiber market.”
